Together™

Connect programs

PREMIER

*Sustaining
improvement
across your
organization
requires more
than temporary
reactions.*

High-performing cultures require a framework of standard data tools and proven processes. Premier's Connect programs – **QualityConnect™**, **SafetyConnect™** and **LaborConnect™** – provide a comprehensive, integrated framework of product and service offerings aimed at addressing the pressing industry challenges facing healthcare organizations today. Leveraging Premier's vast clinical process expertise and the wealth of knowledge stemming from our nationwide, groundbreaking QUEST and HQID performance improvement initiatives, Premier's Connect programs will allow members to benefit from the best practices of top performers and the learned common elements of a successful collaborative.

More than just software tools, these programs involve the assimilation of three core components – **data analytics and business intelligence**, **performance improvement support services and collaborative knowledge sharing**.

Experience shows that shared goals, combined with commitment and transparency in practices, lead to the most improvement for hospitals. Program participants will recognize significant return-on-investment, just as Premier has been delivering to our members for nearly 40 years.
